

Concept Testing Questionnaire

Concept Card 1.0 | © XII Studio Advisory | By Dr. Khalil Laghari

Step 1 — Understand Current Behavior

1. **Tell me about the last time you experienced this problem or need. What happened?**

Purpose: Checks whether the problem is real and recent.

2. **How do you currently solve or manage this problem today?**

Purpose: Reveals current alternatives, workarounds, and habits.

3. **What is difficult, frustrating, or missing in your current experience?**

Purpose: Identifies pain points and unmet needs.

Step 2 — Show the Concept Card

Show the concept card and say:

“Please read this concept as you normally would. There are no right or wrong answers. We are testing the idea, not you.”

Give the participant 60–90 seconds to read.

Do not explain or pitch the idea.

Step 3 — Check Understanding

1. **What do you think this product or solution is about?**

Purpose: Tests clarity of the concept.

2. **Who do you think this is designed for?**

Purpose: Checks whether the target user is clear.

3. **What problem or need do you think it is trying to address?**

Purpose: Tests whether the user understands the value proposition.

Step 4 — Explore Value and Relevance

1. **What part of this idea, if anything, feels most useful or valuable to you?**

Purpose: Identifies perceived value without forcing positive feedback.

2. What feels unclear, unnecessary, or missing?

Purpose: Reveals confusion, gaps, and weak parts of the concept.

3. How is this better, worse, or different from how you solve this problem today?

Purpose: Compares the concept against real alternatives.

Step 5 — Explore Trust, Barriers, and Action

1. What would make you hesitate to use this?

Purpose: Reveals adoption barriers, trust issues, cost concerns, or effort concerns.

2. What would need to be true for you to try this?

Purpose: Identifies requirements for adoption.

3. Would you take a next step today, such as signing up, joining a beta, trying a prototype, or recommending it to someone? Why or why not?

Purpose: Tests intent through a more concrete action.

Optional Closing Rating

On a scale of 1–5:

- How clear is the concept?
- How relevant is it to you?
- How likely are you to try it?
